

Hidden Leading Edge Bar

For 2.5" x 4.5" Leading Edge Bar
 (pools narrower than 22')

Encapsulated Guide

Skimmer height is set for a water line 4" below top of tile for encapsulated guide and 5" below for screw-on guide. Internal walls such as spas must 4½" below bond beam. Because coping and deck thickness vary, housing depth is always measured from the top of beam or top of encapsulation.
