

Product Introduction / Enhancement

Part # Introduced / Updated:

M2222 – Locking plate for Zero Reveal Lid Lock

A2895 - Lid Lock Kit for Zero Reveal Flush Lid

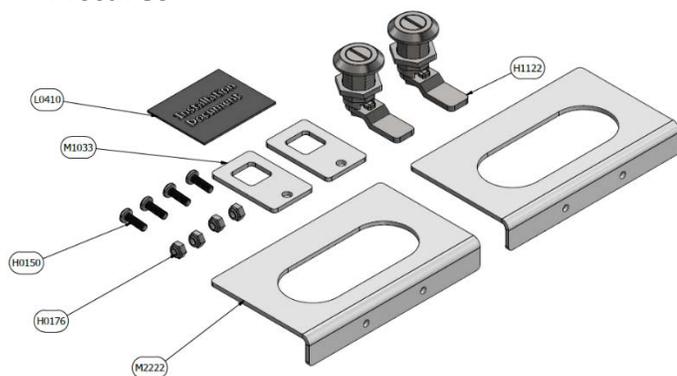

Features:

This new plate is designed to work exclusively with the zero reveal lid. It replaces the end support for that style of lid, and includes a slot for the lock to latch into. That prevents the lid locks from slipping away from the end supports in high winds. The new locking plates & mounting fasteners will be included in kit A2895. Pricing will be updated to reflect these added parts.

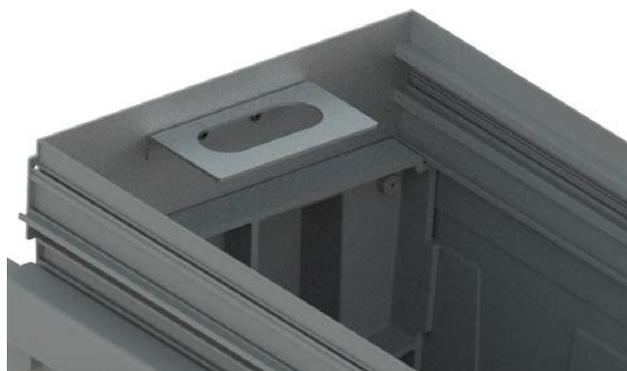

Availability:

Stock of the M2222 locking plate is being produced now. New orders for A2895 lid lock kit will include the new lid locking plate after (March 8th).
