

Gunite Pool Lowered Bond Beam

For 2.5" x 4.5" Leading Edge Bar
 (pools narrower than 22')

Encapsulated Guide

Skimmer height is set for a water line 3" below top of tile for encapsulated guide and 4" below for screw-on guide. Internal walls such as spas must be 2" below bond beam. Because coping and deck thickness vary, housing depth is always measured from the top of beam or top of encapsulation.
